GitHub | LinkedIn | LeetCode

Professional Summary

Entry-level Java Developer and Computer Science and Business Systems undergraduate with strong foundations in Core Java, Object-Oriented Programming, Data Structures and Algorithms, and DBMS/SQL. Built and deployed three database-driven Java applications using Spring Boot, Spring Security, JWT, Spring Data JPA, PostgreSQL and MySQL, following clean layered architecture and Git-based workflows. Strong problem solver (400+ LeetCode problems), comfortable debugging, writing maintainable code, and collaborating in a remote team. Eager to learn and grow in enterprise software development.

Education

B.Tech in Computer Science and Business Systems **Expected 2027**
KIT's College of Engineering **CGPA: 7.56/10**

Technical Skills

- **Languages:** Java (Core Java, Java 8+), SQL, Python, HTML, CSS
- **Core Concepts:** Object-Oriented Programming, Collections, Exception Handling, Multithreading, Data Structures & Algorithms, DBMS, Software Design Principles
- **Frameworks:** Spring Boot, Spring Framework, Spring Security, Spring Data JPA, Hibernate, Spring AI
- **Databases & Caching:** PostgreSQL, MySQL, SQL Queries, Indexing, Flyway, Redis
- **Backend:** REST APIs, Client-Server Architecture, JWT Authentication, Role-Based Access Control, DTO Validation
- **Tools & Version Control:** Git, GitHub, Maven, Docker, Render, IntelliJ IDEA, Eclipse
- **Practices:** SDLC, Agile Methodologies, Layered Architecture, Debugging & Troubleshooting, Clean Code

Projects

URL Shortener API GitHub
Java, Spring Boot, Spring Security, JWT, PostgreSQL, Redis, Spring AI, Docker

- Built a Java/Spring Boot REST API for secure short-link management, URL redirection, click tracking, and analytics, following clean layered architecture.
- Implemented JWT authentication (registration, login, refresh tokens) with ownership-based authorization for protected URL operations.
- Designed the PostgreSQL schema using Spring Data JPA and Flyway migrations, with indexes for URL lookup, ownership, expiry, and click analytics.
- Used Redis for short-link caching and rate limiting across **3 API groups**: authentication (10/min), URL creation (30/min), and redirects (120/min).
- Developed analytics APIs (daily, weekly, monthly, country, browser, device, top URLs) and integrated Spring AI for alias generation and traffic insights.
- Containerized with Docker and deployed on Render with PostgreSQL, Redis-compatible storage, and Actuator health checks.

SalesSavvy Backend API GitHub
Java, Spring Boot, Spring Security, JWT, MySQL, Razorpay

- Developed a Java REST API for e-commerce workflows covering product, cart, order, user, and payment management with MySQL.
- Secured the application with Spring Security, JWT authentication, and role-based access control for user and admin operations.
- Integrated Razorpay with payment verification and order processing; built admin APIs for sales analytics and product/user management.

Coolie Express – Porter Booking Platform GitHub
Java, Spring Boot, JWT, PostgreSQL, Java Mail Sender

- Developed Java REST APIs for porter and traveler management with secure role-based access control.
- Implemented JWT authentication and OTP-based email verification using Java Mail Sender.
- Structured business logic using DTO validation, a service layer, and global exception handling; deployed on Render with PostgreSQL.

Achievements & Certifications

- Solved **400+ problems** on LeetCode, focused on Data Structures and Algorithms, demonstrating strong problem-solving skills.
- **NPTEL Programming in Java** – 98%. Certificate
- **NPTEL Cybersecurity** – Elite grade, 91%. Certificate
